

REFRIGERATION CONCEPTS, INC.

ENGINEERING & DESIGN SERVICES

RCI has a complete design and engineering staff with the capabilities to custom design and develop "cutting edge" applications specific to your company's production and storage requirements.

RCI prides itself on designing the most energy efficient, low maintenance systems available.

RCI specializes in design/build of high speed, low moisture loss, **blast chill systems**.

CONSTRUCTION & INSTALLATION

RCI has the expertise and workforce to take a project from its inception thru design and construction, to a complete "**turn key**" operation.

RCI designs and installations meet or exceed all current applicable codes.

RCI is Michigan's only Authorized **Vilter** stocking/servicing distributor and **Frick Factor**.

SERVICE

RCI services what we sell.

In this day and age, a company cannot afford to have its scheduled production lines or storage facilities shut-down. That's why, **RCI stocks a full line of parts from industry's leading manufactures such as: Vilter, Frick, FES, Refrigerating Specialties, Henry, Hansen Technologies, and many others.**

Our Refrigeration and Controls Technicians are **factory trained and licensed** to provide the most excellent service possible. Our technicians know what it takes to troubleshoot and repair refrigeration equipment and related components by bringing years of experience to the job. PLUS, RCI offers **24/7/365 EMERGENCY SERVICE.**

On both new and older facilities, we can perform a Facility Mechanical Integrity Inspection, which follows strict OSHA and IIAR guidelines. A written report explaining what is needed to bring a facility up to current standards will then be generated. RCI can provide all services to meet these requirements. In addition, **RCI** offers training classes to bring plant personnel up to speed concerning plant operations and OSHA requirements.
